EXPERIENCE

Mobilestyx Consulting Private Limited, — Jr.PHP Developer

APRIL 2022 - PRESENT

In my previous role at Mobilestyx, the company was actively involved in projects with Land Rover, Jaguar, POMS COMS, and ICICI. As a part of the Business-As-Usual (BAU) team, I managed a substantial portfolio, overseeing more than five projects, including NFA, Stock Locator, Maximizer, where I was responsible for developing new functionality and handling project backends. Additionally, I contributed to FS Jaguar and Land Rover Portal, VME, and ICS projects, specifically focusing on backend operations. Presently, I am seeking a new opportunity to apply my experience and skills in an environment that fosters innovation and dynamism.

PROJECTS

Online Nursery shop —

Project Description:In this project customers can buy plants, seeds, pots, online. It helps to save time in the sales and purchase process. Microsoft Visual Studio 2012 is used in the front end and SQL Server 2012 is used in the back end. Asp.Net language is used to easily work on projects. Various needs of customers are fulfilled in this project
My contribution to the project: I did all the activities like form designing, coding database connectivity etc. Also, used c# language for this project, I tested this project to run properly.
