OBJECTIVE

- With over 8 years of experience in web development, including 2+ years working with CodeIgniter, 1 year with Laravel, and 2 years with WordPress, I offer comprehensive expertise in web development. I am proficient in utilizing OutSystems Service Studio, Integration Studio, and related tools. Additionally, I have experience in Power BI for data visualization and continuously enhance my skills through self-learning in OutSystems.
- My capabilities extend beyond technical proficiency to effectively manage client relationships, ensuring project success through clear communication and understanding. I am eager to innovate and contribute to the success of new projects.

EDUCATION

Bachelor of Engineering, Computer Engineering   Jun 2006 — Jun 2010
NRIIIST   6.3/10

WORK EXPERIENCE

Senior Web Developer, Aanseaa Technology   Oct 2023 — Jul 2024
Azure Development and Management
- Created and managed user stories within Azure, ensuring clear and actionable tasks for development.
- Pulled code from repositories and effectively worked on new branches to implement and test features.
- Conducted thorough code reviews and collaborated with team members to maintain high code quality.
- Managed various tasks within Azure, including deployment, monitoring, and maintenance of cloud services.

Finderec Application Development and Maintenance
- Worked on the development and maintenance of the Finderec application, built using Laravel with an SQL database.
- Enhanced the user enrollment process for the secure emergency contact management system, allowing users to update their emergency contact information online.
- Integrated automated email update reminders, ensuring users were consistently reminded to update their information.
- Ensured seamless data updates across schools, employers, and various organizations.
- Implemented secure access protocols for authorized personnel to retrieve emergency contact information via the web or a 24-hour call center.
- Contributed to the backend development to support the dynamic updating of member information and maintained data integrity across all connected entities.

ERP Development for Schools (Finderec Application)
- Developed a comprehensive ERP system for schools within the Finderec application, specifically for superadmin management.
- Features include:
- Adding and managing groups
- Adding and managing schools
- Generating reports and managing payment details
- Tracking active group members and new member registrations

URL: https://finderec.com/
Skills
- **Cloud Platforms:** Azure (Story creation, branch management, code deployment)
- **Web Development:** Laravel, SQL
- **Version Control:** Git (Branching, merging, pull requests)
- **Project Management:** Azure DevOps

Web Developer, Right Avenue Enterprises, working on-site at TCS Bengaluru.   Jun 2022 — Jul 2023
Responsibilities
- I worked on a project for the Honeywell Application Project.
- Digital Tier, AeroCost Management System, and Unified Access Tracking System are the project names.
- Linux-based SAP data loading activities The concept of Linux commands and using Putty
- I'm working on an AWS upload application. Vulnerability fixes for all applications, client communication, and understanding the requirements
- Proficient in HTML5, CSS3, JavaScript, and codeigniter.
- Configure the production database to serve as the backend database.
- Strong understanding of web standards, cross-browser compatibility, and performance optimization techniques.
- Collaborated with team members or peers to ensure the scalability and availability of the application.
- Leverage OutSystems Service Studio for rapid visual development of responsive web and mobile applications, minimizing
- the need for extensive hand-coding.

Web Developer, Peoples University   Aug 2018 — Jun 2022
Responsibilities:
- **Front-End Development**: I was in charge of developing and modifying website functionalities, as well as cross-browser compatibility and implementing responsive design with HTML, CSS, Bootstrap, and media queries.
- **Content Management**: I have actively monitored and updated website content, such as blog articles and news updates, to ensure that the information is up-to-date and relevant to the audience.
- **Bootstrap Framework**: My knowledge of the Bootstrap framework has allowed me to create responsive designs that ensure websites run properly on a variety of devices and screen sizes.
- **Back-End Development**: I have prior experience in back-end development, including data querying and management using MySQL databases. This all-encompassing approach to web development enables the seamless integration of front-end and back-end components.
- **Dynamic Web Pages**: Using client-side scripting languages, I have successfully created dynamic web pages.

Web Developer, MP Online Limited   Jan 2018 — Jul 2018
- **Analysis and Design:**
- Led project requirement analysis and tailored website structure and user interface for the tourism industry. Proficient in CodeIgniter and PHP frameworks.
- **Coding and Implementation:**
- Directed front-end and back-end coding for a seamless user experience, employing diverse technologies. Experienced in CodeIgniter and PHP development.
- **Technical Support:**
- Provided dedicated post-deployment technical support, promptly resolving client queries and issues.

JR.PHP Programmer, AEGLE MEDITECH LLP   Jul 2016 — Jun 2017
Responsibilities:
1. I am deeply engaged in the development of Doctor-G, a product utilizing the MVC architecture through the CodeIgniter framework. My primary focus lies in two core modules:
2. **Pharmacy Module**: I have played a pivotal role in designing, developing, and maintaining the pharmacy module.Collaborated with UX/UI designers and back-end developers to create seamless web applications that meet design and functionality requirements.
3. **Patient Module**: In the patient module, I have actively contributed to the creation and enhancement of features crucial for comprehensive patient data management.
